Commendation letter

Dear Mr. Markov,

I would like to thank you for the services provided to us by the Semliki Rift Trading Company. Earlier this year, we had to undertake an ambitious mobilization effort which had a very challenging deadline that we couldn't meet with our own marine resources. For this reason we proceeded to contract the services of your RO/RO barge "MV Alexia" after verifying that both the vessel and personnel met all the legal and QHSE requirements to operate for CNOOC.

During more than four months of continuous operations, the vessel was functional and on time with the schedules assigned to the crews always met. In terms of QHSE, your team responded swiftly and openly to any issues raised by us, they were also were pro-active in identifying issues and reporting them to CNOOC.

Based on our experience with Semliki Rift's services, we would recommend your services without hesitation as a serious and professional Marine Contractor in this remote and difficult region.

We wish you success in your future endeavors and look forward to working with you in the future, should a need arise.

Sincerely,

Robert Skene
Marine Operations Supervisor
